I am a passionate and dedicated Computer Science and Engineering student at Sri Krishna Institute of Technology, with a strong foundation in software development, Java programming, and data structures and algorithms. I have a keen interest in emerging technologies such as Artificial Intelligence and Machine Learning, and I actively seek opportunities to apply my knowledge through real-world projects and coding competitions. With a problem-solving mindset and a continuous learning attitude, I strive to contribute to innovative solutions that create meaningful impact in the tech industry.

EDUCATION

SRI KRISHNA INSTITUTE OF TECHNOLOGY BANGALORE — ENGINEERING *Jul 2022 – Present*
Bengaluru

BGS PU COLLEGE — PRE UNIVERSITY COLLEGE *Jun 2020 – Jun 2022*
Bengaluru

ST MARY'S ENGLISH HIGH SCHOLL — HIGH SCHOOL *Jun 2010 – Jun 2020*

PROJECTS

— *Arduino Uno radar* *Jul 2023 – Sep 2023*

- Developed a Arduino Uno radar utilizing C++ and JAVA, resulting a search of obstacles in the surroundings and is responsible for rotating the servo motor, reading data from the ultrasonic sensor, and sending the data to the Processing IDE via serial communication. As a component of security systems to monitor and detect movement .

— *Telemedicine Portal* *Aug 2024 – Nov 2024*

- Developed a telemedicine portal utilizing Python and HTML, resulting in an increase in user engagement and a reduction in patient wait times. Collaborated with a cross-functional team to integrate additional features into the telemedicine portal, leading to an improvement in patient satisfaction ratings.

— *AI-Powered Fraud Detection for Online Transaction* *– Present*

- Conducted an in-depth review of 8+ IEEE and peer-reviewed research papers focused on AI applications in fraud detection. Gained conceptual understanding of false positives and false negatives and their impact on fraud detection model performance.
